

King Contracting, Inc. was established in 1999 by Jeremy King and has been serving our customers in the Midwest ever since. We are licensed to work in several states, and have worked all over the United States, from Florida to California and from Texas into Canada.

We are a leader committed to providing progressive directional drilling construction and related services while assuring a safe and healthy work environment for our associates, clients, and the public. Our goal is to perform quality work that meets or exceeds our client's requirements and expectations while taking responsible care of the environment.

We are committed to personal service, honesty, integrity, and quality. Our goal is to enhance efficiency and create an environment where we can develop innovative solutions for each project; fostering partnerships of shared goals with our clients that lead to the greatest value.

Underground Construction, Utility Installation, and Trenchless Services.

King Contracting is your best choice for the underground installation of utilities—gas, electric, water, sewer, or telecommunication lines.

Our rigs have the capabilities of installing anything from 2" Fiber Optic Conduit to Sanitary Sewer on grade. Our larger rigs are capable of installing up to 42" Pipeline with lengths up to 5000 feet. We provide wire line services with accurate as-built drawings for our clients. We have drilled in rock, sand, cobble, and clay. We have the capability to work in environmentally sensitive areas, cross country projects, major river and lake crossings, railroads and highways, and city streets within the city limits.

Our Equipment

King Contracting maintains up to date equipment. We use the most advanced directional drilling and guidance systems available today. Our directional drilling rigs range in size from 10,000 lbs to 500,000 lbs. We typically furnish our own excavators and vac support on site. We maintain a fleet of trucks to support and mobilize our drill crews. We take pride in the quality of equipment we own, and strive to keep our equipment in excellent condition.

Why Use King Contracting, Inc.?

- > Our Midwest location keeps mobilization costs down
- > Excellent safety record assures least time lost from injury
- > Planning, scheduling, and execution expertise assuring on-time completion
- > State of the art equipment and people
- > Experienced crews and excellent references
